

TECHNICAL & SEO REPORT

Fun Holidays — Website SEO & Technical Implementation Summary

A complete record of all SEO optimisations, meta tag configurations, structured data, keyword strategy, and technical improvements applied to the Fun Holidays Sri Lanka website.

Site funholidays.lk **Platform** Vite + React (SPA) **Hosting** Hostinger (Apache) **Date** August 2026
Search Console Submitted manually

SECTION 01

Files Created & Updated

src/hooks/useSEO.js

NEW

Custom React hook that sets per-page title, meta description, keywords, canonical URL, Open Graph tags, Twitter Card tags, and JSON-LD schema. Also injects a global TravelAgency / LocalBusiness schema on every page.

index.html

UPDATED

Title changed from *fun-holidays* to the optimised site title. Full set of default meta description, meta keywords, Open Graph, Twitter Card, and canonical tags added.

public/sitemap.xml

NEW

XML sitemap covering 26 URLs — all static pages, 5 tour detail pages, 9 destination/experience detail pages, and 4 blog posts. Priority and changefreq set per URL type.

public/robots.txt

NEW

Standard robots.txt allowing all crawlers and pointing to the sitemap URL at *funholidays.lk/sitemap.xml*.

public/.htaccess

UPDATED

SPA routing retained. Added browser cache headers (1 year for assets, 1 hour for HTML, 1 day for sitemap), gzip compression, and security headers (X-Content-Type-Options, X-Frame-Options, Referrer-Policy).

src/pages/*.jsx (x11)

UPDATED

All 11 page components updated to call useSEO() with page-specific title, description, keywords, canonical URL, and JSON-LD schema object.

SECTION 02

/blog	Blog	Includes publisher with logo ImageObject reference.
/blog/:slug	Article	Dynamic — headline, description, image, datePublished, author, publisher, mainEntityOfPage per post.

SECTION 06

Open Graph & Social Sharing Tags

All pages now include a full set of Open Graph and Twitter Card meta tags, set dynamically per page by the useSEO hook.

- `og:title` — per-page title
 - `og:description` — per-page description
 - `og:type` — website
 - `og:site_name` — Fun Holidays
 - `og:url` — canonical URL for the current page
 - `og:image` — Fun Holidays logo (<https://www.funholidays.lk/fun-holidays-logo.png>)
 - `og:locale` — en_US
 - `twitter:card` — summary_large_image
 - `twitter:title` — per-page title
 - `twitter:description` — per-page description
 - `twitter:image` — Fun Holidays logo
-

SECTION 07

Canonical URLs

Every page now has a `<link rel="canonical">` tag set to its definitive URL. For static pages, the canonical is hardcoded. For dynamic pages (tours, destinations, blogs), the canonical is built from the current pathname. This prevents duplicate content issues if the site is ever accessed via multiple URLs.

SECTION 08

Technical & Infrastructure Improvements

- **sitemap.xml** — 26 URLs submitted to Google Search Console (submitted manually). Sitemap `funholidays.lk/sitemap.xml` is served at
- **robots.txt** — Created at root. Allows all crawlers; Sitemap directive points to sitemap.xml.
- **Browser caching** — Assets (images, JS, CSS) cached for 1 year. HTML cached for 1 hour. Sitemap and robots.txt cached for 1 day.
- **Gzip compression** — Enabled via `mod_deflate` for HTML, CSS, JS, JSON, and XML responses.
- **Security headers** — `X-Content-Type-Options: nosniff`, `X-Frame-Options: SAMEORIGIN`, `Referrer-Policy: strict-origin-when-cross-origin` — all of which are positive trust signals for crawlers.
- **meta robots** — `index, follow` set on every page.
- **meta author** — Fun Holidays set in index.html.
- **theme-color** — `#f97316` (Fun Holidays orange) set for browser chrome on mobile.
- **Image alt text** — Descriptive alt text added to key images (stilt fishermen, destination gallery images, blog images).
- **SPA routing** — `.htaccess` `mod_rewrite` rule ensures all React Router paths are served correctly without 404s on page refresh or direct URL access.

SECTION 09

Google Search Console

✓ **Completed manually**

Site verified and added to Google Search Console. Sitemap URL (`https://www.funholidays.lk/sitemap.xml`) submitted for crawling. Google will begin indexing pages as it processes the sitemap — full indexing typically takes a few days to a few weeks depending on domain authority.

- Monitor **Coverage** report for any crawl errors or excluded pages.
- Check **Performance** report after 4–6 weeks to see which queries are generating impressions.
- Use **URL Inspection** tool to manually request indexing for key pages if needed.
- Resubmit sitemap if new pages are added (MICE new pages, blog posts, etc.).

SECTION 10

Other Site Changes Made During This Session

- Phone number updated** — All instances of the previous number changed to `+94 32 225 4811` across TopBar, Footer, ContactSection, and TailorMadeSection.
- Email standardised** — `info@funholidays.lk` used as both mailto href and display text across all components. All email clicks open the correct recipient.
- Footer Services redirects** — Services links now point to appropriate pages: Best Tour Guide → /destinations, Tour Booking → /tours, Hotel Booking → /tailor-made, Ticket Booking → /contact.
- Google Translate widget** — Custom-styled dropdown added to TopBar. Supports 130+ languages with flag icons for popular languages and a search box for any language. Drives translation via the Google Translate API without showing Google's default UI.
- Language dropdown z-index fix** — Dropdown z-index raised to z-[60] to prevent the Navbar (z-50) from obscuring the top of the dropdown.
- Hostinger .htaccess** — Apache mod_rewrite rules added for SPA routing, cache control, gzip, and security headers.
- Copyright year** — Updated to © 2026 in Footer.
